

College of Natural and Applied Sciences

Graduate Environmental Science Program

There is high demand for environmental scientists, locally and nationally. In fact, more than 90% of our graduates work in environmental positions in industry, government, or research. **Graduate research assistantships are available to cover tuition and provide a stipend for the student.**

Research Opportunities

- Tropical and estuarine ecology
- Aquatic pollution and toxicology
- Karst hydrogeology
- Water resources economics
- Waste water
- Stream hydraulics
- Invasive species
- Aquifer management
- Paleoclimate
- Tropical meteorology and El Nino
- Erosion and sediment transport
- Soil science and field geology
- Typhoon dynamics and effects
- Geospatial analysis
- Water resources engineering
- Water production and distribution
- Water quality
- Groundwater modeling
- Coral reef and coastal processes

Are you a UOG graduate?

UOG's Environmental Science Program is looking for graduates with math, science, computer science, economics, science education or business degrees.
