From: Celine Cabading, Cheryl Sanguenza, Maika Vuki (Review Team for Evaluation of Assessment Inventories AY 2013-2014)

Date: 3/2/2015

Subject: **Evaluation of Assessment Inventories AY2013-2014**

The final report for the Evaluation of Assessment Inventories for the AY2013-2014 is provided. There were a total 33 program that submitted their assessment inventory either through TracDat or the UAC template. From these programs, a total of 67 PLO's were assessed.

The Review Team adopted the lens of an outside reviewer to address their task to:

1. Provide a review and feedback for all AY2013-2014 assessment inventories submitted by programs.
2. Identify some exemplars of well developed assessment reports and methods.

Completed products submitted to you are:

1. The rubric to assess each PLO.
2. The feedback for each program provided for each PLO that was assessed.
3. Overall Feedback Summary based upon all the inventories that were reviewed. The summary highlights the general area of weaknesses and the possible improvements to strengthen the assessment of PLOs in the future.
4. Overall summary of scores.
5. Minutes of each meeting.

We anticipate programs to be given their individual feed back (item #2 above) plus copies of items # 1, 3, and 4)

In developing the rubric the review team aimed to capture the best approach to assessment of learning outcomes at UOG. The rubric should be simple and easy to use.

The Review Team referred to several sources and in particular the WASC rubric for assessment of Programs, Arizona State University Assessment Plan/Report Feedback, and the TracDat Template. The final rubric has 6 categories: Submission Status, PLOs, Means of Assessment or Goals of Assessment Method, Benchmark, Results, Actions and Follow Up. Under the six categories there are 2-4 subcategories that address specific areas.

While the UAC template was used by 57% of the programs for their submission, the Review Team feels that the template does not adequately address all the assessment components that are necessary to critically evaluate learning outcomes. Therefore, it was impossible to capture the essence of the programs assessment activities for those that used the UAC template. Hence one of our recommendations is to adopt the TracDat as the template for all future submissions or revise the UAC template to be consistent with the TracDat submission.

One weakness encountered in the TracDat template is the lack of description on the assessment plan. While this may be inferred from the overall assessment report, it would be more useful to include a section on assessment plan in the TracDat system. Otherwise it can be submitted as a related document.

The rubric utilizes a numeric score. This score provides an overall ranking of the PLO assessed. The total points gained under each category are normalized by dividing by the number of subcategories. The total from all categories was also treated in the same way but here it was normalized by the total number of categories, i.e. six. These numbers are clearly stated under the score section in the table together with the overall score as the Final Rating.

The summary comments of the Reviewers are carried under the Notes section of the table.

A clear statement on the PLO was fundamental in this review exercise since a meaningful assessment could only be achieved when properly aligned to the PLO. The alignment of PLO to ILO was also deemed necessary by the Review Team to provide a clear link from SLO to PLO then to ILO. Since most of the TRacDat submissions used the four column report, the ILO statement was therefore excluded. We are proposing the inclusion of ILO statement in the future submissions, meaning generating a five column report through TracDat.

Overall the evaluation of assessment results at UOG is still at the ranking of **Initial** stage. The Review Team has made some overall statements as to how these could be improved in the future. However, it would be imperative for each program to critically evaluate their respective feedback and address areas of weakness.

A number of programs have clearly shown great initiative through a well developed assessment plan and the engagement of most of the program faculty. These should serve as a model for UOG and these programs should be recognized. Although no program achieved the **Highly Developed** in the Final Ranking, the following programs have shown a strong standing in the **Developing** stage:

1. Clinical Psychology
2. Anthropology
3. Chemistry
4. Psychology
5. Political Sciences

One notable observation from this review exercise is the number of programs that did not submit any inventory at all. We propose that programs be given "no submission status" for the particular year concerned. This should to be reflected in the UAC input for that particular program's Self Study report. However, UAC may wish to provide some measures to improve the compliance rate.

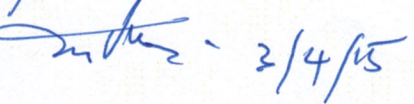

Finally, we would like to thank you and the SVP for providing us the opportunity to undertake such a review exercise. We all learned and gained tremendously.

Should there be any questions pertaining to this report, we will be happy to assist.

Sincerely,

 3/4/15
Celine Cabading

Cheryl Sanguenza

Maika Vuki  3/4/15

EVALUATION OF ASSESSMENT INVENTORIES

DRS
CELINE CABADING, CHERYL SANGUEZA AND MAIKA VUKI

OUR TASK

(DOCUMENT 1)

- Evaluate all assessment inventories for one academic year (AY 13-14)
- Evaluate each section in the assessment inventory template
- Evaluate program assessment plan as expressed through the alignment and flow between each section in the assessment inventory template
- Provide feedback to programs
- Identify 2-3 exemplars

** We adopted the lens of an outside reviewer to complete our task.*

(12.12.14 minutes)

SUBMISSION SUMMARY

- 33 programs submitted
- 67 PLO's reviewed
- 57% of those submitted used the UAC template

OUR MEETINGS

- December 5, 2014 11:45 – 12:30
- December 12, 2014 1:04 – 2:20
- December 17, 2014 1:00 – 2:20
- December 19, 2014 11:15 – this one ran long
- January 05, 2015 10:00 – 11:30
- January 09, 2015 10:00 – 12:12
- January 19, 2015 1:00 – 2:15 (yes, this was a holiday)
- January 21, 2015 1:00 – 3:00
- February 02, 2015 11:00 – 12:12
- February 09, 2015 11:00 – 12:55
- February 16, 2015 11:00 – 12:42
- February 25, 2015 11:00 – 12:30

*** individual reflections and the assessment of the submissions were done prior to above meeting times*

TO COMPLETE OUR EVALUATION, WE:

1] [Created a Rubric](#) (Doc 2a, 2b, 2c)

- Reviewed other rubrics
- Used WASC as a lens
- Considered UOG goals
- Considered rubric and assessment language
- Thought ultimately what would an assessor want to know from reviewing a submission
- Thought how can programs use feedback to improve
- Used TracDat template as our frame

6 categories that directly align with the TracDat template

2-4 subcategories in each of the 6 categories

Let's look at the PLO Category...

AND WE:

2] [Created A Scoring Template](#) (Doc 3)

- Blind review with each Reviewer conducting his/her own assessment while filling out this scoring template
- Then we met to review scores.
- When scores differed, discussion followed until we came to a consensus.

3] Compiled a [final rubric feedback for each program.](#)

- Calibrated score and compiled notes

4] Compiled an anecdotal [overall findings for each category](#) (Doc 4)

OUR PROCESS IN A NUTSHELL

- CREATED A RUBRIC
- PILOTED, CALIBRATED, AND MODIFIED RUBRIC (2x)
 - Discussed issues with language, rater consistency, refined “what do we want to know”
- ASSESSED BATCH 1 (~ 10 programs)
 - Calibrated scores, confirmed notes, refined understanding of rubric
- ASSESSED BATCH 2 (~ 10 programs)
 - Calibrated scores and notes
- ASSESSED BATCH 3 (~ 10 programs)
 - Calibrated scores and notes
- CALCULATED SCORES, COMPILED OVERVIEW OF FINDINGS.

SCORING SCALE

| SCALE | Initial 1 | Developing 2 | Highly Developed 3 |
|-------|--------------|-----------------|-----------------------|
| Range | 0-1.99 | 2 – 2.99 | 3 and up |

Final rubric scores lie primarily in the Initial and Developing stages

FOUR RECOMMENDATIONS

BASED ON OUR EXPERIENCE IN COMPLETING THIS TASK

-1-

UAC TEMPLATE VS TRACDAT

While the UAC template was used by 57% of those who submitted, the Review Team feels that the template does not adequately address all the assessment components that are necessary to critically evaluate learning outcomes.

Recommendation:

Adopt the TracDat as the template for all future submissions or revise the UAC template to be consistent with the TracDat submission.

-2-

WHAT TRACDAT DOES NOT CAPTURE

Missing in the TracDat template is the opportunity to articulate a description of the assessment plan.

Recommendation:

While a plan may be inferred from the overall assessment report, it would be advantageous to include a section on assessment plan in the TracDat system. This brief would contextualize the elements in the template.

-3-

WRITTEN PLO'S

A clear PLO statement was fundamental in this review exercise. A meaningful evaluation could only be achieved when elements aligned to a well written PLO. Otherwise, the evaluation was simply a review of each element independent of its relationship to the PLO.

Recommendation:

Professional development on writing PLOs.

-4-

ALIGNMENT BETWEEN PLO AND ILO

Missing in the TracDat template is the opportunity to articulate the alignment of PLO to ILO.

Recommendation:

The inclusion of an alignment between PLO and ILO in the future submissions,

OVERALL EVALUATION

The overall evaluation of Assessment Inventory Submissions suggests that submissions are primarily at the **Initial** stage.

As seen in the Overall Findings for Each Category Document (doc 4), the Review Team has offered recommendations for improvement.

It is imperative for each program to critically evaluate their respective feedback and address areas of weakness.

EXEMPLARS

A number of programs have shown initiative through a well developed assessment plan and the engagement of multiple program faculty.

Although no program achieved **Highly Developed** in the Final Ranking, the following programs have shown a strong standing in the **Developing** stage:

1. Clinical Psychology
2. Anthropology
3. Chemistry
4. Psychology
5. Political Sciences

THANK YOU!!

A sincere thank you to SVP Dr. Anita Borja-Enriquez and Deborah Leon Guerrero for providing us the opportunity to undertake such a review exercise. This was an amazing learning experience!

Assessment Inventory Rubric

Program: _____

Year assessed:

PLO ____/____

Reviewer:

| | Initial (1) | Developing (2) | Highly Developed (3) | Notes |
|----------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| Submission Status A. Timeliness B. Quality of completion C. Document template | A. Document submitted late. B. Document is incomplete OR completed with non-cohesive information C. Document completed in the UAC template. | A. Document submitted on time. B. Document may be missing minor information elements, but is otherwise complete. C. Document completed in TracDat. | A. Document consistently submitted on time (at least 2 times in a row) B. Document is complete. C. Document completed using most updated TracDat format with related links. | |
| PLO A. PLO identified B. Alignment of PLO to Program Statement C. Alignment of PLO to ILO. | A. PLO not identified or is identified, but are too broad and lacks clarity. PLO's language resembles a course learning outcome. B. No evident alignment between PLO and Program Mission Statement. (ex: no Program Mission statement to align to) C. No evident alignment between PLO and ILO. | A. PLO identified and articulates competencies with an action verb that clearly demonstrates the skill or behavior to be observed and measured. B. Implied or loose alignment to Program Mission Statement. C. Implied or loose alignment to ILO. | A. PLO identified and articulates competencies with an action verb that clearly demonstrates the skill or behavior to be observed and measured AND PLO's language is indicative of an end of program learning outcome. B. Clear alignment between PLO and Program Mission Statement. C. Clear alignment between PLO and ILO. | |

| | Initial (1) | Developing (2) | Highly Developed (3) | Notes |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| Means of Assessment or Goals of Assessment A. Assessment tool. B. Description/Quality of assessment tool (appropriateness of data tool, variability of tool) C. Assessment Plan (ex: alignment with PLO, multiple tools at different times in program) [BEFORE IMPLEMENTING ASSESSMENT] D. Faculty participation/collaboration/engagement | A. Assessment tool not identified B. No clear description of assessment tool and/or does not assess PLO. C. No clear assessment plan or assessment plan does not align with PLO. The assessment plan is stated but not complete or realistic. D. One faculty or one course assessing the PLO. | A. Assessment tool is identified. B. Assessment tool assess PLO at some level. C. Assessment plan aligns with PLO, but plan missing some details. Assessment plan is articulated with some details. D. Evidence of faculty collaboration are present. | A. More than 1 assessment tool identified. B. Assessment tool assess PLO comprehensively. C. Assessment plan deliberately aligns with PLO and goals for program assessment conveys insightful plans to improve quality of student learning, retention, program efficiency. D. Faculty collaboration is strongly evident (ex: multiple faculty across different time points in program). | |
| Benchmarks A. Clearly stated B. Justification of benchmark met or not met | A. No benchmark B. The assessment just reported data without any criteria identified. | A. Benchmark is present, but needs refining (clarity, level) B. Some justification for Benchmark present (ex: benchmarks not met repeatedly with no explanation, or met | A. Benchmark is clearly stated and appropriate. B. Justification clearly articulates purpose and description is explicitly offered on how the results of | |

| | | | | |
|--|--|-------------------------------------------|-----------------------------------------------------------------------------|--|
| | | and no explanation of what will do next). | assessment activities will be used to modify and improve learning outcomes. | |
|--|--|-------------------------------------------|-----------------------------------------------------------------------------|--|

| | Initial (1) | Developing (2) | Highly Developed (3) | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Results A. Raw data reported B. Summarizes the results (related links) C. Analysis of data | A. Few to no raw data are reported. B. Summary of findings are not reported C. No analysis of data OR analysis are not supported by the data | A. Raw data are generally reported from most assessment activities B. Summary of findings are reported on some outcomes. C. Some analysis of data is provided. | A. Raw data are reported on all assessment activities B. Summary of findings on all outcomes are reported with comparing/ contrasting of findings from multiple measures. C. Clearly developed and well thought out analyses are reported and supported by the data. | |
| Actions and Follow up A. Actions identified B. Alignment with the analysis and quality of follow up C. Evidence of improvement <i>in program</i> | A. No action to change or maintain program outcomes is identified. B. No clear follow up action from the analysis of data. C. No evidence of improvement is reported. | A. Action/s to maintain or change the majority of outcomes is reported. B. Present data have influenced some actions to change or maintain program outcomes. C. Evidence of improvement is reported on some learning outcomes. | A. Action/s to maintain or change the majority of outcomes is extensively described. All actions reflect the thoughtful use of the analyses. B. Strong evidence that present data have influenced detail, meaningful, programmatic changes. C. Strong evidence of improvement is reported in all learning outcomes. | |

Assessment Inventory Rubric
Overall Feedback Summary

Year assessed: 2013-2014

| Submission Status | Common Strengths | Common Weaknesses | How to Improve |
|-----------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| a. a. Timeliness | Many completed of all four columns in a clear and cohesive manner and on time. | If information given was not grounded in a PLO, quality was low. The most common incomplete document was having results but no action. UAC format does not capture needed data. All attachments should be easily accessed. Links to websites should not be included. | Clear alignment between PLO and rest of template information. Fill out all relevant sections of the TracDat table. Complete TracDat 5 column with relative links. |
| b. Quality of completion | | | |
| c. Document template | | | |
| PLO | Common Strengths | Common Weaknesses | How to Improve |
| a. PLO identified | Many PLOs were developed and clearly stated. Some very clear connection between PLO and Program Statement. Related links provided additional descriptions | PLOs were too general. Program statement missing to align with PLO or no clear alignment. Lack of alignment of PLO to ILO. Too many PLO's identified, but only one/few truly assessed. | Write brief and properly articulated PLO's that overtly align to your program statement. Reference which ILO the PLO addresses. Report ONLY the PLO that is assessed. Number of PLO assessed must be realistic. |
| b. Alignment of PLO to Program Statement | | | |
| c. Alignment of PLO to ILO. | | | |
| Means of Assessment or Goals of Assessment | Common Strengths | Common Weaknesses | How to Improve |
| a. Assessment tool. | Assessment tools were listed. Some level of description was often written. Some units were overt about multiple faculty participation. Units clearly assessed PLO at multiple course and time points throughout the program. | Description of tool (to assess how it aligns with PLO) was sparse. Assessment Plan had to be inferred vs overt. Often a PLO was only assessed by one faculty member and/or one course. Several PLO's assessed with only one tool. UAC template does not clearly ask for a PLO. | Write brief description of how assessment tool assess PLO in tool description. Make assessment plan overt. Articulate how multiple faculty across different time points in program are involved with assessing any individual PLO. |
| b. Description/Quality of assessment tool (appropriateness of data tool, variability of tool) | | | |
| c. Assessment Plan (ex: alignment with PLO, multiple tools at different times in program) | | | |
| d. Faculty participation/collaboration/engagement | | | |
| Benchmarks | Common Strengths | Common Weaknesses | How to Improve |
| a. Clearly stated | Benchmarks were offered by all units who submitted via TracDat | Many benchmarks were not clear with percentage reference (ex: 80% of | Write a benchmark that describes what is your scale for improvement |
| b. Justification of benchmark | | | |

| | | | |
|---------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| met or not met | Some units offered a justification of benchmarks met or not met. Some units gave a clear report in related links. | class will improve vs 80% of class will earn an 85% or above...) Justification of benchmark itself was grossly missing. Lack of specificity in benchmark. In the UAC template, benchmarks are not captured. | and justify why you chose your scale. Explanation as to why benchmark was met or not met should be evidence based and stem from reflections about course and program design. |
| Results | Common Strengths | Common Weaknesses | How to Improve |
| a. Raw data reported | In template, many units gave a summary of the data. Clear reports were added in related links. | Raw data were rarely reported. Many summaries and analysis were superficial. Some results were present but not aligned with identified tools. Some have too many results in progress. | Give raw data, and a summary and analysis of that data that brings out information relative to improvements you need to make to address PLO. |
| b. Summarizes the results | | | |
| c. Analysis of data | | | |
| Actions and Follow up | Common Strengths | Common Weaknesses | How to Improve |
| a. Actions identified | Actions were often shared. There was some alignment between analysis and follow up. Some programs demonstrated changes in program (curriculum and in delivery method) based on data summaries. | Actions sometimes did not align with improving PLO benchmark. Actions had nothing to do with data or PLO. Actions were missing if PLO were met. Evidence of improvement in <u>program</u> was rarely addressed. Some proposed improvement were too board and missing specific actions. | Write clear actions with data to support that action. Even if PLO is met, identify and explain what are your next steps. Articulate evidence of improvement in PROGRAM. |
| b. Alignment with the analysis and quality of follow up | | | |
| c. Evidence of improvement IN PROGRAM | | | |

Overall Suggestion:

Use the 5 column TracDat with pertinent related links.

Make sure your PLO is an appropriately written PLO (not too vague, is a learning outcome indicative a PROGRAM learning outcome).

Fill out template so someone outside your program clearly understands:

- 1] How your PLO aligns to your program statement and ILO.
- 2] How your assessment tools assesses progress in the PLO (via brief but descriptive tool description and benchmark) throughout your program.
- 3] How you have designed/made changes that align with the analysis of your data.
- 4] University to consider another section in TracDat where the assessment plan is included.

PLO Assessment Report - 4 Column

University of Guam

Program (CLASS) - GR Clinical Psychology

Mission Statement or Program Description: The Master of Science in Clinical Psychology is based on the scientist-practitioner model and is designed to provide students with comprehensive knowledge and skills to practice clinical psychology and conduct mental health research in Guam and the Micronesian region. The program will emphasize the social, cultural and political contexts of research, theory, and practice in clinical psychology and encourage students to develop professional skills that are responsive to the unique multicultural communities in this region.

PLO Assessment Report - 4 Column

University of Guam

Program (CLASS) - UG Anthropology

Mission Statement or Program Description: The program is focused on the study of culture change, and the biological and cultural history and adaptations of indigenous Pacific populations. Faculty members are presently engaged in research in archaeology, biological anthropology, cultural anthropology, cultural change, and biomedical anthropology.

| PLOs | Means of Assessment & Benchmarks / Tasks | Results | Action & Follow-Up |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Program (CLASS) - UG Anthropology - Anthropology 1 - Understand the current issues and debates in the subfields of anthropology.</p> <p>Year(s) to be Assessed: AY 11-12 AY 12-13 AY 13-14</p> <p>Start Date: 01/21/2012</p> <p>End Date: 12/31/2014</p> <p>Outcome Status: Active</p> | <p>Assessment Tool Description: AN101 Assessments</p> <p>Assessment Tool: Pre/Post Test</p> <p>Benchmark: 75%</p> <p>Related Documents: AN101 Assessment Benchmark AN101 Assessment Chart AN101 Assessment Report AN101 Assessment Chart AN101 Midterm AN101 Pre/Post Test </p> | <p>09/30/2014 - 80%</p> <p>Result Type: Benchmark Met</p> <p>Assessment Year: 2013-2014</p> <p>Semester(s) Data Collected: Spring</p> <p>Related Documents: FARRER_ASSESSMENT_REPORT_AN101.SP13.pdf </p> | <p>09/30/2015 - I am satisfied with this result as it shows an overall improvement from 36% to 80% and meets the benchmark set. Hence next year I will assess a different PLO.</p> <hr/> |
| <p>Program (CLASS) - UG Anthropology - Anthropology 2 - Utilize the concept of culture as a fundamental organizing concept of anthropology.</p> <p>Year(s) to be Assessed: AY 12-13 AY 13-14 AY 14-15</p> <p>Start Date: 08/15/2012</p> <p>End Date: 01/15/2015</p> <p>Outcome Status: Active</p> | <p>Assessment Tool Description: In this assessment I considered if the students were integrating the complexity of the peoples and cultures of the Pacific in a wide general vision of the area, or if, to the contrary, they were getting a partial or fragmented vision of the area. The assignment proposed for the Spring 2014 focused mainly in a concrete culture in the Pacific selected previously by the students. In this case some students might pass the course knowing in depth one area, but ignoring the rest of the Pacific cultures.</p> <p>Assessment Tool: Pre/Post Test</p> <p>Benchmark: 20% improvement</p> | <p>09/24/2014 - As a result I confirmed that there was a low integrative knowledge on the cultural area. Names of cultures of the Pacific generally increased, but they did mostly on the area that the student has previously prepared for the assignment 1 (ASSIGNMENT 1: Class Presentations and portfolio. Students will present different peoples from Polynesia, Melanesia and Micronesia. (Units 6, 7, 9, 10, 12, and 13)), or in many cases were still misplaced. There was not a clear improvement over 20% as I expected.</p> <p>Result Type: Benchmark Not Met</p> <p>Assessment Year: 2013-2014</p> <p>Semester(s) Data Collected: Spring</p> | |

PLO Assessment Report - 4 Column

University of Guam

Program (CLASS) - UG Psychology

Mission Statement or Program Description: As a behavioral science, and as a distinct but integral part of natural science, psychology stands between physiology and the social sciences. Psychology, like Anthropology, links the behavioral sciences with the biological sciences. The major areas of psychological study are concerned with individual human behavior conceptualized as a natural phenomenon, studied by scientific and experimental methods, and understood in terms of psychological theories and laws.

The general objectives of the program in Psychology are to increase students' understanding of themselves and others, to enhance the skills of those specializing in related areas of study, and to prepare those pursuing psychology as a career for graduate study and professional work.

The student learning objectives for the Psychology Program are articulated with those of the American Psychological Association.

When is the next program review due?: December 2013

Program Assessment Plan created or revised?: Yes

When was the last year of program review? : 2003-2008, submitted April 2011

| Program (CLASS) - UG Psychology - Critical Thinking - Acquired and can appropriately apply critical thinking skills in Psychology. Year(s) to be Assessed: AY 13-14 Start Date: 10/01/2011 Outcome Status: Active | Assessment Tool Description: Psychology program started to assess critical thinking skills in Fall 2012 by using Insight Assessment's standardized test in two of its required research methods courses, PY 210 and PY 413. These two courses are chosen because they are the two of the few required courses, and their content emphasizes Research methodology, with an emphasis on developing logical, | 04/29/2014 - Students were administered Insight Assessment's Critical Thinking Skills test in the beginning of PY 413 course and at the end, in Fall 2013, utilizing a pre-post-test design. Insight Assessment's CTS instrument measures critical thinking skills in seven subcategories, which include Analysis, Interpretation, Inference, Evaluation, Explanation, Induction and Deduction. Post test measures resulted in several significant improvements in students' scores: 1) Students' | |

| | <p>Assessment Tool Description: Practice problems in interpreting correlations (identifying multiple causal explanations for a given statistical association) and assessments embedded in presentations, exams and Final Exam in PY101 General Psychology</p> <p>Assessment Tool: Course Embedded Questions</p> <p>Benchmark: Section 2, provided with regular, weekly practice in — and with special biweekly exam questions on — identifying alternative explanations for correlational relationships, projected to outperform Section 1 (no such special practice, only standard course content with coverage of this topic during second week) by $\approx .5$ standard deviations on the final assessments, during the Final</p> | <p>09/29/2014 - Final Exam sessions in both sections of the course included an assessment in which students interpreted each of three different correlations from different research projects. After section membership had been masked, I scored a randomly selected sample of $n = 31$ completed assessments from each section, using a rubric to quantify success in identifying alternate explanations for the correlations; and analyzed the scores statistically.</p> <p>As predicted, students in PY101-02 more often correctly solved the problems in causality: with a mean score .42 standard deviations higher than in Section 1. The analysis of the difference between mean scores produced a t statistic of 1.68, with a directional probability of a Type I error of .05. This indicates that the observed superiority of Section 2 was 95% certain to be due to systematic differences between the groups (rather than</p> | |

PLO Assessment Report - 4 Column

University of Guam

Program (CLASS) - UG Political Science

Mission Statement or Program Description: Political science provides education toward enlightened citizenship and statesmanship, and prepares students for careers in government and politics, law, and business, or for graduate studies in a wide range of professional areas. The general political science curriculum provides knowledge of the theory and practice of political power, authority, and justice, with focus on the United States and the Asian-Pacific region. The program also emphasizes reasoned evaluation of societal principles, analysis of political behavior, and logical expression of thought. These skills are valuable to professionals, public officials, researchers, and educators.

When is the next program review due?: December 2015

Program Assessment Plan created or revised?: In progress

When was the last year of program review? : 2004-2010

| Program (CLASS) - UG Political Science - Explain - Explain the American political system and its relationship to the Micronesian region Year(s) to be Assessed: AY 13-14 | Assessment Tool Description: To assess achievement of this SLO, students were given a pre-test during the class session following the University's add/drop period and the post-test during the regularly scheduled semester final exam. Both tests consist of 15 multiple-choice questions. For PLO #2, students were required to identify the different characteristics, functions, and powers of each of the branches of the U.S. federal government and the role each branch plays in relation to U.S. citizens. Assessment Tool: Pre/Post Test Benchmark: 80% of students enrolled in the class would have an overall score 8 out of 15 on the | 10/01/2014 - The expectation was that 80% of students enrolled in the class would have an overall score 8 out of 15 or scored above average on the post-test. In comparison to the first cycle of assessment (AY 2012-2013) where 15% of students scored above average, the assessment taken during the Fall 2013 semester revealed that 80% of students scored 10 out of 15 or better on the post-test. The benchmark for the assessment in this second cycle year was met following the changes to the course content. The results for Fall 2013 are as follows: Mean score on pretest: 4 correct out of 15 Mean score on posttest: 10 correct out of 15 Result Type: Benchmark Met | |

| Program (CLASS) - UG Political Science - Apply theories - Apply theories to the study of domestic and international conflict Year(s) to be Assessed: AY 13-14 | Assessment Tool Description: Students were assigned a research paper to test the efficacy of two theories in explaining a political outcome by comparing political processes that led to the outcome occurring or not occurring in two countries. For PS SLO 3, students were required to clearly identify two theories that they would be testing, explain the basic assumptions of each and derive a relevant hypothesis from each. Students were required to submit an initial proposal and a draft for comments from the instructor as well as from other students. Students were told that they would be assessed on the criteria listed in the rubric below. Ratings of 6 were given to papers which exhibited the superior attributes of the 5 criteria related to this PLO. Ratings of 3 were given to the Struggling papers exhibiting the attributes listed below, 4 to those Emerging, and 5 to those who had solidly Developed. Assessment Tool: Project Benchmark: 80% of the class would have an overall score at or above the 5 rating, or had Developed among the criteria | 10/01/2014 - The results are attached. Unfortunately, only 25% of the class met the criteria for level 2, and no one met the criteria for a superior paper. The areas in which the students Struggled the most were clearly in creating a hypothesis relative to a theoretical approach. Result Type: Benchmark Not Met Assessment Year: 2013-2014 Semester(s) Data Collected: Fall Related Documents: Swamy_Assessment Report (PLO3_2013-2014).pdf | |
